ABOUT HONGLING

Guangzhou Hongling was founded in 1979. It is one of the earliest manufacturers of baking ovens in China and ranks among the top ten manufacturers of baking equipment in the country.

Over nearly half a century, Hongling has grown from a company focused on bakery equipment and far infrared electric heating technology into a modern manufacturer. Its facilities include automated sheet metal production lines, large laser cutting machines, CNC punching machines, and bending centers. Hongling also operates its own production lines for electric and gas heating components, enabling quality control from core parts through to finished equipment.

Hongling combines its commitment to craftsmanship with a responsibility to support the baking industry. It sponsored the Guangdong competitions of the 25th and 26th National Baking Vocational Skills Competitions and works with institutions including Baiyun College to train baking industry professionals.

Brand Overview

Hongling places strong emphasis on technological innovation. It has been recognized as a National High-Tech Enterprise and holds multiple national patents. The company has also developed digital systems that support most of its daily operations, obtained three software copyrights, and gained the capability to provide digital transformation services to other businesses.

Hongling has developed more than 300 products across three main categories: commercial bakery equipment, food processing machinery, and commercial kitchen equipment. The company operates under an ISO 9001 quality management system, while relevant products hold certifications including EU CE and China CCC, helping it meet the needs of different markets.

Hongling's business reaches more than 120 countries and regions, with a focus on markets in South Asia, Southeast Asia, South America, Africa, and the Middle East. In China, it works with more than 150 distributors. Hongling has also filed trademark registration applications in key markets across South Asia, Southeast Asia, and Europe.

Hongling has received recognition for its product quality and contributions to the industry. It was named a "Guangdong Contract-Honoring and Creditworthy Enterprise" for 36 consecutive years and has received honors including "China Top 100 Commercial Kitchen Equipment Enterprise" and "China's Most Influential Bakery Equipment Enterprise."

Looking ahead, Hongling will continue to invest in intelligent manufacturing, technological innovation, and global service. It will work with its partners to support the long-term development of the global baking industry.
